Virtuosant releases VFAST Foundation Portal

Virtuosant Technology, Inc. releases Version 1.1 of its VFAST Foundation Portal Software

March 4, 2009 – Virtuosant Technology, Inc. announced the release today of its Virtuosant Foundation Application Solution Technology (VFAST) Foundation Portal Version 1.1. VFAST Foundation Portal 1.1 delivers an elegant and comprehensive solution that produces a customized, quick start implementation of your IBM Websphere Portal® in a fraction of the time and at substantially below budget. The VFAST solution set provides a quick start portal framework that *fast forwards* your organization's Websphere Portal® roll-out plan.

Custom portal implementations can be both complex and costly. A typical implementation can take over 4 months and cost in the hundreds of thousands of dollars. VFAST Foundation Portal 1.1 can have your portal up and running in less than 10 days.

VFAST Foundation Portal 1.1 is available as a single-install package and runs on the most current releases of IBM Websphere Portal®.
